SF User Group Meeting 7/30/08

In Attendance: BSC, Lake Region, Mayville, Minot, NDSCS, Bottineau, UND, VCSU, Williston, Marie, Dee

Agenda:

A. Discussed the priority of Marie's work. The following order was approved with majority approval:
   1. 1098-T data integrity problems.
   2. Working on current tickets. This includes the ticket for the service indicator stopping other institution refunds.
   3. Two of the three UND queries for their HigherOne refunds.
   4. The modification to the credit history $ amount. This was ranked lower since it is not critical.
   5. A query that shows students who are registered for 0910 who have unpaid prior balances will not be developed at this time since there are work-arounds to find these students.

B. Dee will submit requests to change the tuition calculation process as follows:
   1. Starting on 8/3, the 0910 batch tuition calculation process will be run for all students on every Sunday. The batch tuition calculation process will be run for only required students on Mondays and Wednesdays.
   2. Starting on 8/2, the 0840 tuition calculation will be calculated for only required students on Saturdays.
